CONTEMPORARY GLASS WALL COVERINGS

## On the Tiles

We often make panels featuring stunning photos on glass of landscapes, cityscapes or animals, using our cutting-edge [digital printing technology](#). But, in fact, any image can be printed onto glass, including those featuring textures, patterns and tessellated designs – this produces a more traditional look that echoes brickwork, wallpaper or wooden panelling, without any of the practical issues that these surfaces can create.

Recently we've been working on designs featuring images of tiles, which deliver classic style with none of the hassle of grout or tile cutting. The photos on glass can be adjusted to fit the size of your space so patterns can be lined up exactly as you wish, creating a bespoke appearance that looks smart, exclusive and high-end.

Without the need for grout, which tends to discolour and disintegrate over time, your tile pattern should look brand new for many years. Glass is very easy to clean and our near-invisible sealant is not so susceptible to mould or staining as grout. What's more, glass's highly reflective surface adds a layer of gloss that will complement a modern design or add a contemporary twist to a traditional interior without spoiling its classic style.

We can reproduce any type of tile design (subject to copyright) and would be very happy to discuss your ideas with you.
