

OPTICOLOUR

CONTEMPORARY GLASS WALL COVERINGS

Quick quote turnaround

Our glass shop aims to provide an estimate within 24 hours (Monday to Friday). If you would like a quote from us, please fill in our [online form](#). It is best if you can provide us with elevations (not just plans) or, preferably, a simple list of panel sizes with the number of socket cut-outs or notches required per panel. 'T' shaped panels are cut from one piece of glass (as opposed to two smaller rectangles stuck together), so please provide the length and width of the 'T' at their longest points – we only require those two measurements. It is also very helpful if you can give us an idea of the kind of glass you have in mind – but we can provide a range of estimates for a variety of [colours](#), [effects](#) and finishes if required.
