

Supply and deliver

If you would prefer to take your own measurements and do not require our survey and installation service, we will happily supply and deliver your glass panels for you to fit yourself. We will ask you to measure the dimensions of your wall space, make your own template, or provide drawings, and we will make the glass to order and send it via courier within 7 to 10 working days anywhere in the UK. Fixing adhesive will be included. Please do not hesitate to call us for advice if needed.

Although as professional glass suppliers we highly recommend our measure and fit service for irregularly shaped walls, large complex spaces, or for panels that require a number of cut-outs and holes, we are happy to accept measurements from customers or contractors for simple square, rectangular or inverted T-shaped panels.

Wherever possible, we will endeavour to cut your panel in a single piece to avoid join lines and ensure a streamlined result. Our state-of-the-art water-jet cutting technology, operated by our skilled and experienced team, can create large sizes of panel with complex shaping to a very high degree of accuracy.

This keeps the number of dimensions required to a minimum - however, if you need any guidance on measuring please get in contact with us and one of our advisors will be delighted to help.

Your finished panels will be securely packaged before they are sent by one of our trusted couriers to their destination. Once delivered they must be handled with the utmost care before being fitted - our glass is toughened but it can still break! We provide adhesive silicone, which is easy to use and will not show through the panel once it is installed - if you have any queries about fitting your glass then please do not hesitate to contact us on 01225 464343 or sales@opticolour.co.uk.
